

Dear partners and home owners,

Thankyou for your interest in an AGS Systems product, by THEINVISIBLETOOLBOX. In the following pages, you will find a compilation of all technical matters of relevance from the manufacturers of the Frame system.

Content:

- TP - Extrusion - A dimensioned Section view _____ Page 2
- TP- Technical Specifications _____ Page 3
- TP - Installation instructions _____ Page 6
- TP - Generic application details by AGS _____ Page 18

AGS solutions are of the highest technical credibility, and manufactured to excellent quality control standards.

The products are designed for easy installation, and a durable, beautiful result.

Installation details pertaining to any particular project may vary.

We encourage you to get in touch with us with any technical question: THEINVISIBLETOOLBOX will be happy to take your wall assembly specific requirements, and offer you a suitable CAD detail for an architectural application, where the relevant profile is detailed into your construction.

THEINVISIBLETOOLBOX, delivers technical support and sales services for the AGS product line in Canada. We are happy to be of service, to include sales support, guidance to tradesmen as well as take on complete door projects.

We look forward to hearing from you,
and taking part in your future opening challenges!
Best, THEINVISIBLETOOLBOX team.

Profile detail

Model TP

Suitable for solid and dry construction

<i>Description</i>	<i>Item number</i>	<i>Standard lengths*</i>
TP	10121-11	1100 mm
TP	10121-22	2200 mm
TP	10121-27	2750 mm
TP	10121-33	3300 mm
TP	10121-55	5500 mm

*Special lengths on request.

Suitable for solid and dry construction

The sub-frame profiles are supplied either mitre-cut to size, or loose for cutting and assembly on-site. They are assembled using locking mitre corner inserts, temporary corner braces and bottom spreader bar. Then the frame is inserted to one side of the opening, attached using moveable brackets. The snap-in mesh ensures no plaster cracks between wall and frame. The timber frame and door is hung from the sub-frame, creating a shadow gap. Suits standard or floor-to-ceiling doors.

Recommendations

On the basis of detailed tests and long-term experiences our technical office has prepared a recommendation list regarding the selection of hinges, closing panels and seals. This lists are practical guidelines and non exhaustive.

Suitable hinges	
<i>Producer</i>	<i>Website</i>
Simonswerk GmbH	www.simonswerk.com
Bartels-Systembeschläge GmbH	www.basyshome.com
Krone Koblenz SpA	www.k-group.com

Suitable closing panels	
<i>Producer</i>	<i>Website</i>
Bonaiti Serrature SpA	www.bonaiti.it
Kaba GmbH	www.kaba.de
Alban Giacomo SpA	www.agb.it
KFV Karl Fliether GmbH & Co. Kg	www.kfv.de

Suitable seals	
<i>Producer</i>	<i>Website</i>
Helmut Goll GmbH	www.helmutgoll.com
Deventer Profile GmbH	www.deventer-profile.com
Primo Profile GmbH	www.primo.com
Schlegel GmbH	www.schlegel.com

We guarantee for a high quality of our products. Our processing guidelines are based on tests and practical experiences; they are only indication without assurance of properties, we have no influence on condition of construction sites and the realizations of the works

Country specific regulations, which consist on regional standards, building regulations, processing and industrial guidelines, can guide to specific processing recommendations.

TP

Bei den Modellreihen TP handelt es sich um Aluminiumprofile zur Fertigung von Blockzargen für den Massiv- und Trockenbau. An da Aluminiumprofil wird ein Holzelement, in welchem die Ausfräsungen für die Schließbleche, Bänder und Dichtungen vorzunehmen sind, verbaut. Je nach Türblatt kann die entsprechende Zarge in einer Stärke von 44 bis 60 mm verbaut werden.

Die Aluminiumprofile stehen als Stangenware in den Längen 1100 mm, 2200 mm und 2750 mm zur Verfügung und sind kurzfristig lieferbar. Diese sind mit einer Schutzfolie versehen und werden im Set verpackt inkl. aller Montage- und Befestigungsteile angeliefert. Je nach Türblattstärke sind die Profile in verschiedenen Breiten erhältlich.

Die Türprofile bestehen aus einer rohen unbehandelten Aluminiumlegierung. Zement und seine Derivate produzieren, bei Nässe, alkalische Substanzen welche, wenn man diese auf der Oberfläche der Aluminiumlegierung arbeiten lässt, zu Korrosion führen kann. Deshalb wird empfohlen die Profile immer frei von Zement, Kleber und Fugenmaterial zu halten. Die Korrosion wird durch die empfohlene bauseitige Grundierung und Lackierung des Profils in Wandfarbe verhindert.

I modelli TP sono profili d'alluminio per porte a filo muro del tipo MINIMAL per strutture massicce e a secco. Sui profili modello TP viene applicato un' inserto di legno nel quale devono essere fresati i fori per le cerniere, lo scontro e la guarnizione. Secondo il modello scelto sono possibili ante da 44 fino a 60 mm.

I profili d'alluminio sono muniti di una pellicola di protezione e disponibili a magazzino nelle seguenti lunghezze: 1100 mm, 2200 mm e 2750 mm. I profili possono essere confezionati come kit inclusi tutti gli accessori per un semplice e rapido montaggio.

I nostri profili porta consistono d'alluminio grezzo, non lavorato. L'alta umidità del cemento e dei suoi derivati producono sostanze alcaline che possono causare corrosioni. Per evitare questo consigliamo di tenere i profili sempre liberi di cemento, colle e altre sostanze corrosive. La corrosione può essere evitata anche verniciando i profili con delle apposite lacche. Tuttavia l'alluminio non è resistente a tutte le composte chimiche.

The aluminium profiles TP are used to create BLOCKFRAMES for solid and dry constructions. A timber support with a size of 44 and 60 mm must be added to the aluminium profile in order to be able to prepare the millings for hidden hinges, striking panels and other hardware.

The profiles are available as standard lengths of 1100 mm, 2200 mm and 2750 mm on stock ready to be shipped in a short time. All profiles are covered by a protective film and packed/delivered in a kit including the mounting- and fixing accessories.

The door profiles are made out of raw untreated aluminium. Cement and his derivatives produce alkaline substances when getting wet, which can provoke corrosion if they have time to work on the surface of the aluminium alloy. We recommend to keep the profiles clear from cement, glue and joints material. The above mentioned corrosion will be prevented by the recommended priming and finishing of the profiles in wall colours.

La gamme de modèles TP sont constituées de profils en aluminium pour la fabrication de portes MONOBLOC à utiliser en construction massive et sèche. Selon le vantail choisi, un noyau de bois correspondant est appliqué sur les profils d'aluminium. Les perçages pour les nappes de penne, les charnières et les joints doivent y être réalisés. Selon le vantail, le dormant correspondant peut être choisi dans une épaisseur de 44 à 60 mm.

Les profils en aluminium sont livrés sous forme de barres et sont livrables rapidement dans des longueurs de 1100 mm, 2200 mm et 2750 mm. Ils sont munis d'un film protecteur et sont livrés par lots, accompagnés de toutes les pièces de montage et de fixation. Selon l'épaisseur d'un vantail, les profils sont disponibles dans différentes largeurs.

En cas d'humidité, le ciment et ses dérivés produisent des substances alcalines susceptibles d'engendrer de la corrosion si on les laisse agir à la surface de l'alliage d'aluminium. C'est la raison pour laquelle il est recommandé de toujours veiller à ce que les profils soient exempts de ciment, d'adhésif et de matériau de joint. Le maître d'ouvrage peut empêcher la corrosion par l'application recommandée sur le profil d'une couche de fond et d'une couche de peinture dans la couleur des murs.
